Believe in Yourself

## We stay safe online by...

### Creating secure passwords

Avoid using easily guessable passwords, such as names, places or personal details.

Keep our passwords to ourselves, so nobody else can access our accounts and information.

### Thinking about who we talk to online

Make sure you know the person who you are talking to.

If you are unsure or unhappy, TALK to an adult you trust before replying.

### Making sure we only access age appropriate material

## Online actions have consequences

The internet is a wonderful space to unite friends and family. It gives us the opportunity to communicate with people all over the world, instantly.

### However, we need to be mindful of what we say and do online...

Even though you can't see the person or people you are talking to, that doesn't mean you can't hurt their feelings.

Be careful! You might not think you're being mean, but the other person might interpret it in a different way.

If you wouldn't say it in person, **don't** say it online!

We must be **RESPECTFUL** members of the online community.

## Talk, talk talk!

Make sure you talk about using the Internet - the more we all talk about it, the more confident all of us will be.
